

Even Bears Can Learn to Tango: Leadership Wisdom for the Ages

Written by:
Ellee Koss, Ph.D.

This is a unique book that is designed to provoke the reader into thinking and leading authentically.

It is a guide for anyone in a 'leadership' role. A CEO of a global enterprise, an executive director of a local not for profit organization, a coach of an athletic team, a teacher, the head of a household, and an elected official are all leaders in their domains. While the scope may differ, the principles of leadership are the same.

Thirty years of experience working with leaders in academia, industry, and community organizations has enabled Ellee to realize that the greatest source of wisdom lives inside of us. To be a successful and authentic leader one needs to be able to access this inner knowledge. Discovering where and how to look for it is the essence of this book.

Ellee has created a colorful, compact book with one idea, thought, question, or definition on each page. It is designed to provoke, to stimulate thought and creativity, and to inspire reaching inside and bringing out what is within.

Reaction by the corporate community to the book has been extremely positive. Comments offered by executives from Silicon Valley include: "Bears Can Tango ... is as entertaining as it is compelling, I keep going back to it for insights and guidance.", "Your book will be a nice addition to any office or learning executive!", and "Even Bears Can Learn to Tango is great for my executive clients ... it's a book of dance lessons to navigate successfully in complex work environments."

Ellee Koss has over 30 years of experience as a consultant and an educator. She is a graduate of Boston University, with a Ph.D. in Economics and a BA in International and Comparative Studies. As a professor, Ellee has worked to bring out the best of what is within her students. In her consulting practice she has focused her efforts on working with clients to build organizational capabilities to create and sustain competitive advantages in the global marketplace. Dr. Koss has been a pioneer and early leader in utilizing vision and values to drive corporate strategy, transformation, and effectiveness. She resides in San Francisco.
